The US Air Force's F-16 strike aircraft should perform their last offensive sorties over Afghanistan in late 2014, as the NATO-led assistance force passes control to Kabul

COMBAT TRANSITION

Air arms from around the globe were in action during 2012, while most budgets faced mounting pressure. We list the inventories and purchase plans of 160 nations

CRAIG HOYLE LONDON

DATA COMPILED BY **SANDRA LEWIS-RICE, JOHN MALONEY, MARC-ANTONY PAYNE**
& **MARTIN SMITH** FLIGHTGLOBAL ASCEND ONLINE FLEETS & MILICAS LONDON

Conflicts in Afghanistan, Syria and between Israeli forces and Hamas militants grabbed the headlines in 2012, along with the major budget issues most militaries continue to face, and the outcomes and implications of presidential elections in the USA and China.

Although the USA and its NATO and other allies plan to end their combat involvement in

Afghanistan by the end of 2014, Kabul still has a long way to go before taking full control of the nation. Its air force and Army Air Corps – which currently operate a combined total of 98 transport aircraft and combat helicopters – will also require more investment to be made in equipment terms if they are to be able to cope after the drawdown phase has concluded.

Time is tight, for example, if the US Air

Force is to drive through a planned light air support acquisition of 20 armed turboprops for the Afghan air force. A programme should be launched in 2013, with an earlier selection of Embraer's EMB-314 Super Tucano having been abandoned.

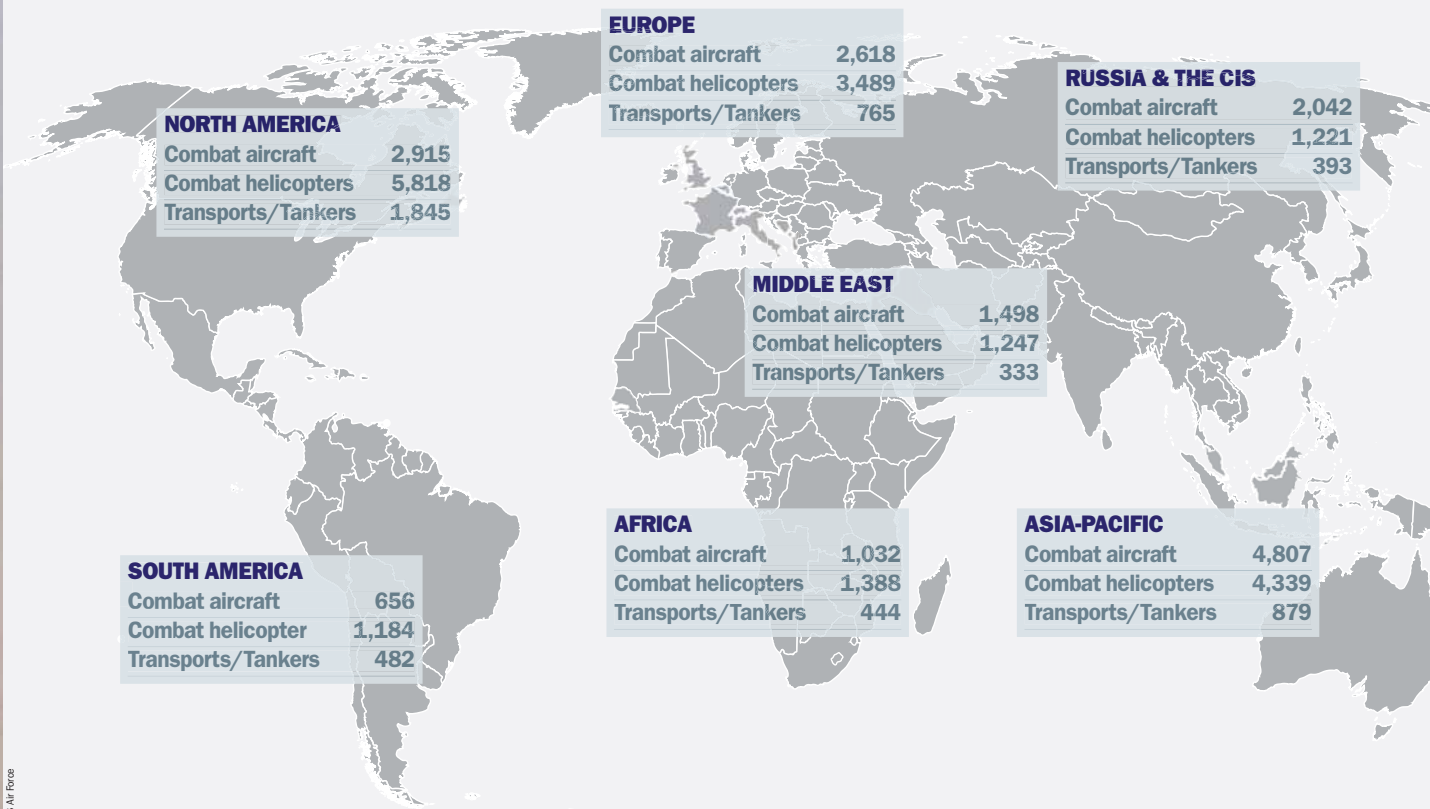

The process of leaving Afghanistan will be a difficult one for participating nations, with a great deal of valuable equipment requiring extraction by air, and land convoys needing significant protection from above.

Another aspect of the Afghan drawdown process will be the conclusion of major joint coalition air operations, after more than a decade of experience gained in the country. The removal of such an opportunity to fly alongside other air forces day-to-day will require nations to participate in more regular large-scale exercises in order to retain the skills learned in combat and maintain links with current partners.

Despite widespread condemnation of the actions of Syrian president Bashar al-Assad's regime in the face of a domestic opposition movement, the prospect of an international intervention similar to that seen over Libya in 2011 remains remote.

With an inventory of 480 Russian-sourced combat aircraft, including RAC MiG-29

WORLDWIDE ACTIVE FLEET PER REGION

US Air Force

fighters and Sukhoi Su-24 strike aircraft, the Syrian air force has been routinely called into action. Television footage has also shown Mil Mi-8/17 helicopters and armed Aero Vodochody L-39 jet trainers used to suppress the uprising.

The Syrian military would represent a different challenge to coalition air forces than during the UN-mandated and NATO-led mission to protect Libyan civilians, because of

its possession of so-called “double-digit” surface-to-air missile systems, also acquired from Russia. Assad’s forces demonstrated their willingness to use such equipment in June, when a Turkish air force McDonnell Douglas F-4E Phantom was shot down after violating Syrian airspace.

November’s eight-day conflict between Israel and Hamas militants in the Gaza Strip underscored the importance of an air force

being able to maintain persistent surveillance cover over a potential conflict area, including with unmanned air vehicles.

HAMAS TARGETS

Israeli air force combat aircraft and helicopters, along with ground artillery and naval vessels, attacked more than 1,500 targets during the “Pillar of Defense” operation. These included not only launchers for the rockets which were being fired into Israeli territory, but also previously identified sites, such as weapons stores, resupply tunnels and even Hamas leaders.

Despite its military might and the impressive performance of its “Iron Dome” anti-rocket shield, Israel’s vulnerability to non-traditional attack had already been highlighted in early October, when a UAV launched in Lebanon entered its airspace, before being destroyed by a Lockheed Martin F-16I.

For the first time, this year’s World Air Forces directory uses information sourced from Flightglobal’s Ascend Online Fleets and MiliCAS databases. Completed in 2011, the merger of Flightglobal and Ascend has resulted in an enhanced product, including improved information on the equipment in use in nations such as China and Russia.

Reve Features

Israeli pilots were called into action over the Gaza Strip

» This year's directory contains almost 51,800 aircraft listed in the active duty inventories of air arms from 160 nations. This represents an overall reduction of fewer than 200 airframes since our 2011-2012 snapshot of the worldwide fleet. A further 6,100 aircraft are shown as the subject of firm orders, with more than 5,700 others pending contract signatures.

Washington's numerical strength is unlikely to be overturned by Russia or growing military power China

Notable major deletions from our previous listing for Soviet-era equipment have included the removal of almost 500 aged Mi-24 assault helicopters from the Russian air force's inventory, along with 220 obsolete Mi-2s.

As with previous listings, the USA dominates the directory in the number of aircraft in use and on order, with its air force, army, Marine Corps and navy together accounting for 27% of all active aircraft.

While Washington's numerical strength is unlikely to be overturned by former rival Russia or growing military power China, the end of its combat commitment in Afghanistan and budget reductions will have a major near-term impact. Unless averted by early January, a Congressionally-threatened sequestration measure could wipe about \$500 billion from the Department of Defense's budget during a 10-year period, with this to come on top of planned reductions of \$487 billion already in the USA's planning cycle.

While the US Air Force says it remains committed to acquiring 1,763 Lockheed F-35A Lightning II combat aircraft, sequestration could yet hurt its plans. In May, the service took delivery of its last of 187 F-22 Raptor

stealth fighters from the company, versus an original goal of acquiring 750 of the fifth-generation type.

The emergence of several developmental Russian and Chinese fighters within the past two years has focused minds within the USA and other nations as to the capabilities that potential future adversaries could purchase. While Western types such as the F-35, Boeing F/A-18E/F Super Hornet, Dassault Rafale, Eurofighter Typhoon and Saab Gripen E will be technologically superior to Chinese models such as the Chengdu J-20 and Shenyang J-31, the latter could eventually prove overwhelming if fielded in sufficiently high numbers.

Beijing's continuing major investment in defence aerospace was highlighted by the first flight of the stealthy-looking J-31 in October, and by Shenyang's J-15 derivative of the Sukhoi Su-33 performing trials from the deck of the Chinese navy's newly-introduced aircraft carrier, the *Liaoning*. China's admission to the elite carrier club – which in 2013 will also include India – was one of the most significant military developments of the year.

MOSCOW MODERNISATION

Moscow, meanwhile, has continued to make a substantial investment in modernising its military machine. Major recent commitments have included orders for 92 Su-34 bombers, 30 Su-30SM fighters and 24 carrierborne MiG-29K/KUBs, along with 39 improved Il-76MD transports. It also has advanced a long-planned project with India to develop a new Medium Transport Aircraft – up to a combined 145 of which could be acquired – and on producing a version of Sukhoi's T-50/PAK-FA fighter. Questions remain, however, over whether Russia will be able to sustain its recent spending spike, and particularly on its ability and desire to develop a proposed new-generation bomber dubbed PAK-DA.

India's planned medium multirole combat aircraft acquisition reached the preferred bid

The Joint Strike Fighter has been on target during weapons release trials

der status in late January, when it awarded a Dassault-led team so-called L1 vendor status with the Rafale, following a battle with the Eurofighter Typhoon. However, New Delhi has yet to sign a contract for the 126-unit deal.

Switzerland's government and air force continue to pursue a deal to acquire 22 next-generation Gripen Es, in conjunction with a Swedish commitment for between 40 and 60 of the type, but Bern's plans face the threat of

Lockheed Martin

a public referendum, which could potentially derail the scheme.

A decision could finally come during 2013 on the direction of Brazil's long-planned F-X2 fighter contract. The nation's previous administration had favoured the Rafale, but a change of government and fresh delays mean the opportunity is potentially also still open to the Gripen and Super Hornet.

Lockheed's F-35 programme, meanwhile,

recently achieved its 5,000th test flight, with the first airborne weapons separation trials having been performed and the first two international examples delivered to the UK, which is now acquiring the short take-off and vertical landing B-model. The same variant is now in the hands of the USMC's first operational squadron to convert to the Joint Strike Fighter, VMFA-121.

In the training aircraft sector, while manu-

facturers continue to await the launch of the biggest contest in decades – to replace the US Air Force's almost 500 Northrop T-38C Talons – most secured fresh orders in 2012.

Alenia Aermacchi benefited from a bilateral agreement between the Italian and Israeli governments, under which the latter nation's air force will get access to 30 M-346 advanced jet trainers. The type will replace the Israeli air force's remaining Douglas A/TA-4 Skyhawk »

» trainers, and made available by a TOR Systems joint venture between Elbit Systems and Israel Aerospace Industries. For its part, Italy will acquire two Gulfstream G550s adapted for airborne early warning duties by IAI's Elta Systems subsidiary.

Also vying for the USAF's trainer requirement is BAE Systems, which signed a deal to produce 22 Hawk 165s for Saudi Arabia. The success represents the UK company's first export deal for the new-generation aircraft that forms the basis of its offer in the T-X battle. Lock-

heed is promoting the T-50 – developed jointly with Korea Aerospace Industries – a type already in use in South Korea and ordered by Indonesia. The Philippines has also expressed interest in potentially acquiring 12 examples.

EQUIPMENT CHOICE

Boeing is expected to pitch a new design for the T-X requirement, which holds the potential to sway the equipment choice of numerous nations over the coming decades.

Swiss manufacturer Pilatus enjoyed a

bumper 2012, securing orders for a combined 79 PC-21 trainers from Qatar and Saudi Arabia, and also finalising a deal to produce 75 PC-7 Mk IIs for the Indian air force. Iraq also made progress with its plans to acquire 28 Aero Vodochody L-159s, while a new era of Russian air force pilot training began as Irkut delivered its first Yakovlev Yak-130s to Borisoglebsk air base in early October.

Partly looking at the looming airlift requirements linked with their departure from Afghanistan, Australia and the UK added lone Boeing C-17s to their fleets in 2012, while Norway swiftly acquired a replacement for the C-130J lost in a fatal accident in March. Canberra also retired its last aged C-130Hs, as its first of 10 Alenia Aermacchi C-27J Spartans entered final assembly.

In the rotorcraft sector, the US Army has formally rebranded its Block III production-standard Apache Longbow the AH-64E, and potential buyers such as India and Indonesia are already eyeing the type.

The early days of 2013 will determine whether the DoD will advance with key programmes such as the F-35 as intended, or have future budget reductions hurt equipment plans made by it and many of its allies. ■ **This year's directory is dedicated to Ascend Online Fleets data researcher Martin Smith, who died on 3 December following a short illness**

Joint exercises offer an important learning experience for air forces, such as those of RIMPAC allies Australia and Indonesia

Commonwealth of Australia

EXPLANATORY NOTES

For the first time, *Flightglobal's* World Air Forces directory 2013 uses fleet data compiled for its Ascend Online Fleets and MilICAS databases by Sandra Lewis-Rice, John Maloney, Marc-Antony Payne and Martin Smith, and abridged by Craig Hoyle. Published as premium products, our databases provide subscribers with detailed fleet and orders information, in the majority of cases down to serial-number level. The directory also includes global fleet analysis provided by Antoine Fafard, from *Flightglobal's* Insight team. Responsible for producing special reports on the aviation

industry, Insight provides bespoke analysis on sectors ranging from business aviation to commercial and military aircraft. To find out more, and to download other special reports, visit flightglobal.com/insight

Fleet information is divided into these categories: **Active:** Aircraft in day-to-day use. For some Soviet-era types where only summary information is available, this also includes some non-operational platforms. **Ordered:** Aircraft on firm order. Others which are pending purchase approval or contract signature are marked with

an asterisk. This category includes current planned order totals, which may be subject to future revision.

Abbreviations

AEW airborne early warning; **Comms** communications; **ELINT** electronic intelligence; **EW** electronic warfare; **MPA** maritime patrol aircraft; **Reccce** reconnaissance; **SAR** search and rescue; **SIGINT** signals intelligence

You count on availability. We provide reliable solutions.

Aircraft availability on the flight line is more than ever essential for the Air Force mission fulfilment. Cooperating with the right industrial partner is of strategic importance and key to improving Air Force logistics and supply chain management. RUAG provides you with new options to resource your mission. More than 40 years of flight line management make us the experienced and capable partner we are – a partner you can rely on.

Together
ahead. **RUAG**

Flightglobal's Defence newsletter

Defence newsletter 

THE F-35 LIGHTNING II TEAM

Welcome to Flightglobal's Defence Newsletter, a fortnightly product bringing you the most military aviation stories, analysis, insight and forecasts from Flight International and Flightglobal.com.

Stories from Flightglobal:

- US Air Force confirms F-22 pilot died in crash
- Zhuohui's China in talks with several potential JF-17 customers
- Falque cracks rules regarding aircraft delivery in F-28 redesign
- PICTURE: Zhuhai's AVIC launches its 10th model with afterburner
- Indonesia orders Super Tucano for light attack role
- South Africa's best weapons in Afghanistan

ATC Global Summit and Conference @ 100 Weeks 2014

ATC Global is the world's premier meeting space for the international air Traffic Management Community with almost 2,000 industry professionals from 50 countries attending across 3 days.

Featuring an exhibition of over 200 leading suppliers, 30 seminars, 10 round-tables and a two-day business conference, ATC Global is the air traffic connecting point.

Visit www.atcglobal.com for further information.

What's Hot

- Flightglobal's special landing page brings you the best news, video and images from the Airshow China in Zhuhai. Plus free access to our three flight interactive magazines.
- PICTURE: US accepts its last C-17 strategic transport
- PICTURE: Airbus chief Enders makes adaptive from A400M
- F-35 crash kills Israeli training flight

What's Happening

- F-35 who 'could slash 33 tonne' report
- PICTURE: Italian navy deploys first A119Fs to Afghanistan
- PICTURE: Airbus chief Enders makes adaptive from A400M

Head of the Week

- Defence Insider: The 2014 Line King reveals the latest news to hit the 2014 Paris Air Show's seemingly endless ECJ-A tanker competition.
- Also on The 2014 Line, we look at one of the more bizarre aircraft models to have emerged at the Airshow Show stand in Zhuhai.

F-22 Raptor

Height	5.09m
Length	18.3m
Wingspan	11.5m
Wing area	79.24m ²
Empty weight	18,750 kg
MTOW	36,500 kg
Propulsion	2 x Pratt & Whitney F119-PW-100
Speed	1.82Mach
